1

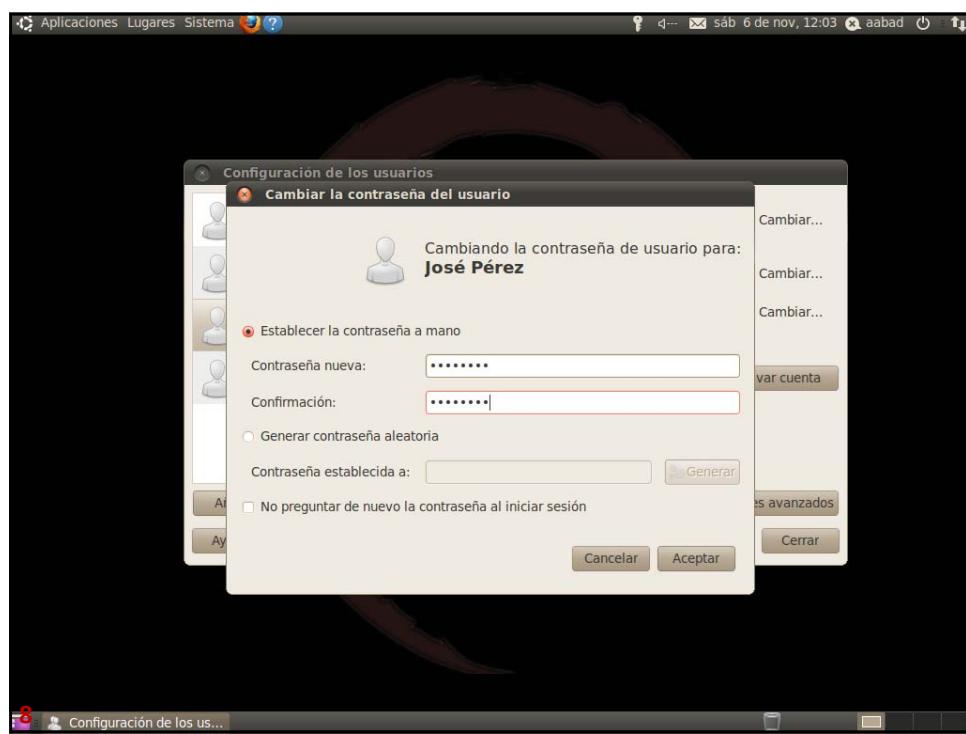

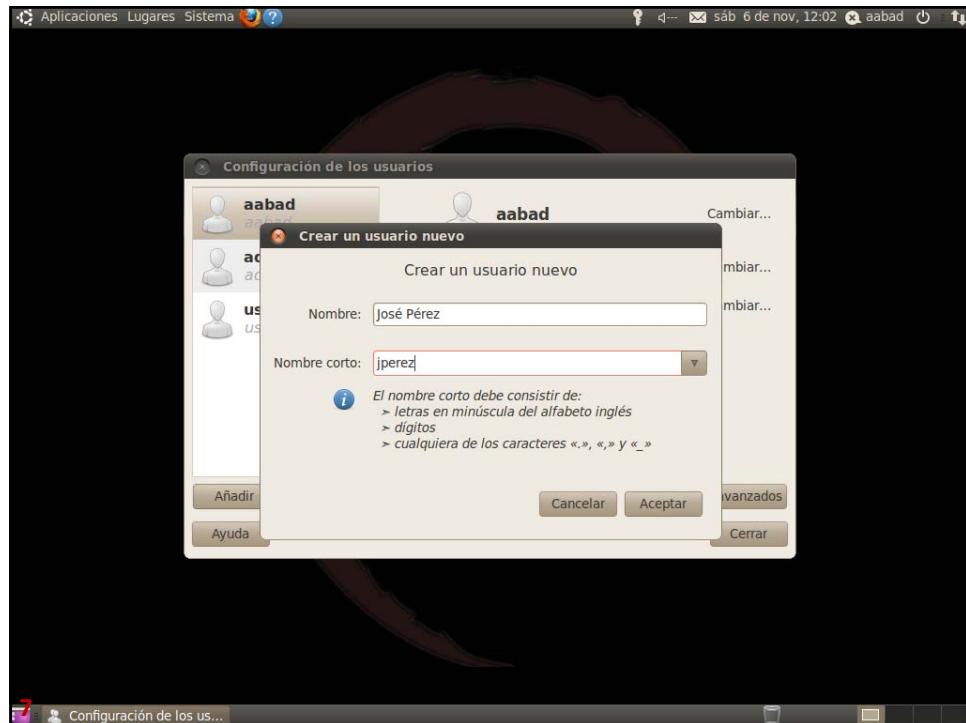

En versiones nuevas de Ubuntu Desktop conviene añadir las tools de Gnome para la gestión de usuarios y grupos:
`sudo apt-get install gnome-system-tools`

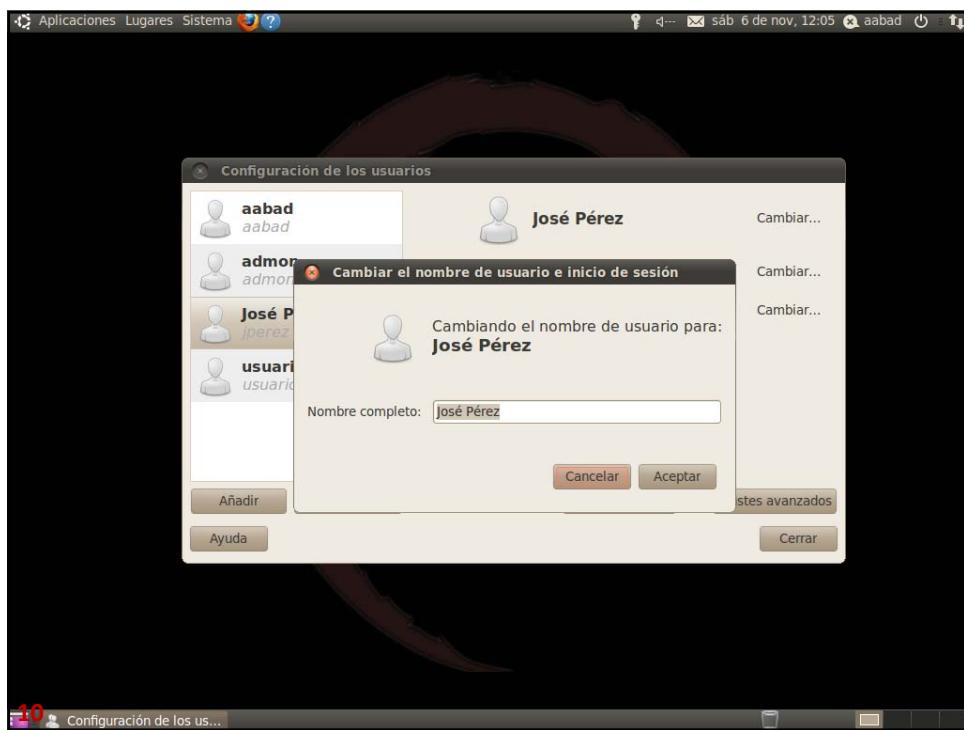

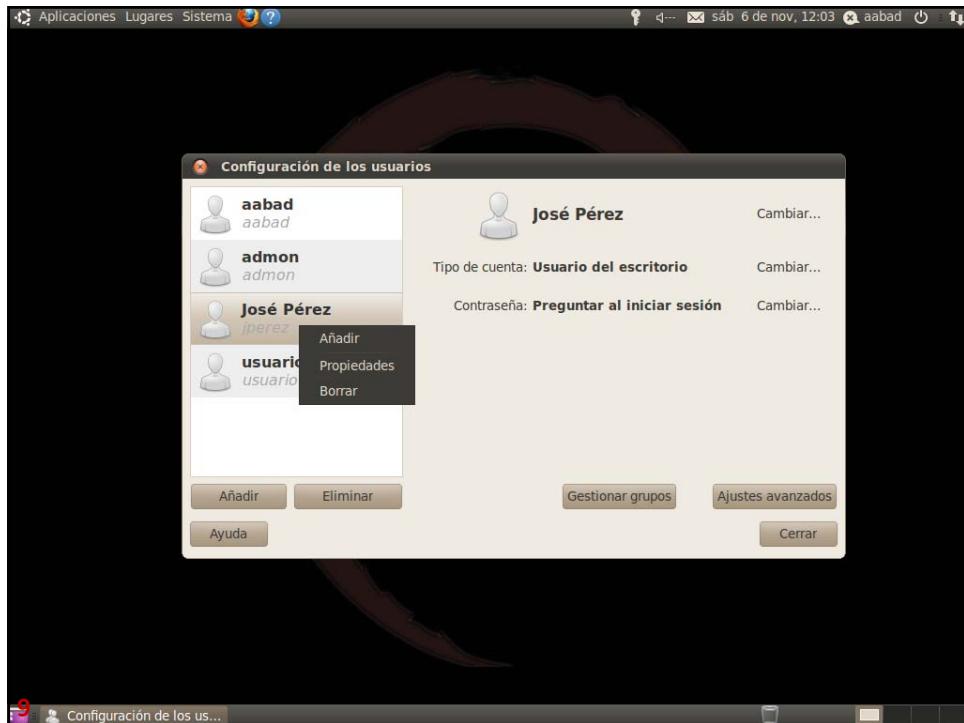

GESTIÓN DE USUARIOS

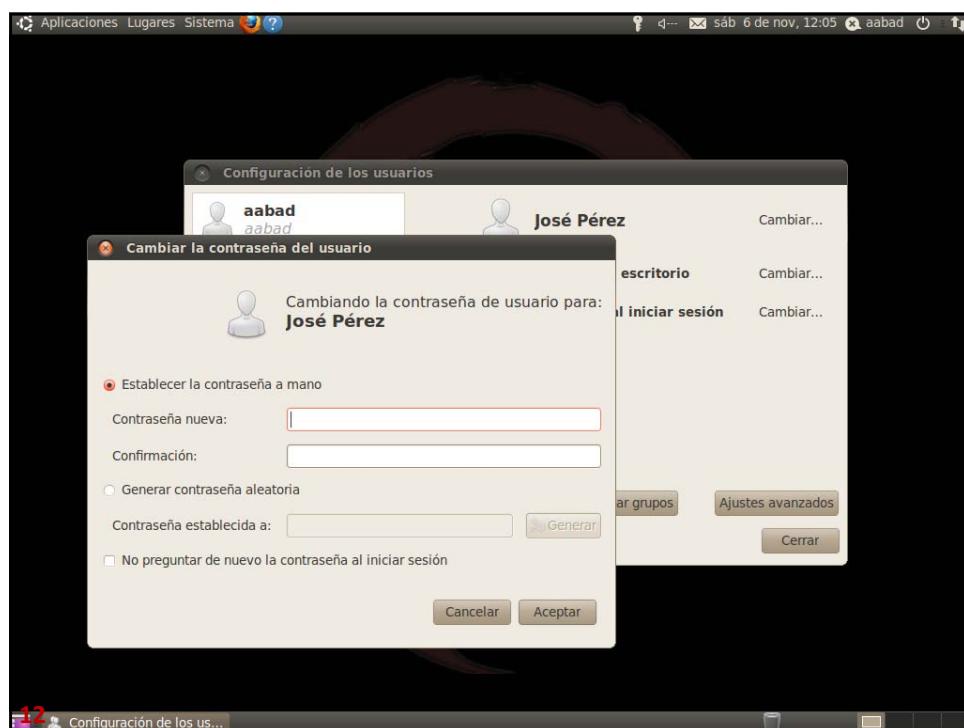

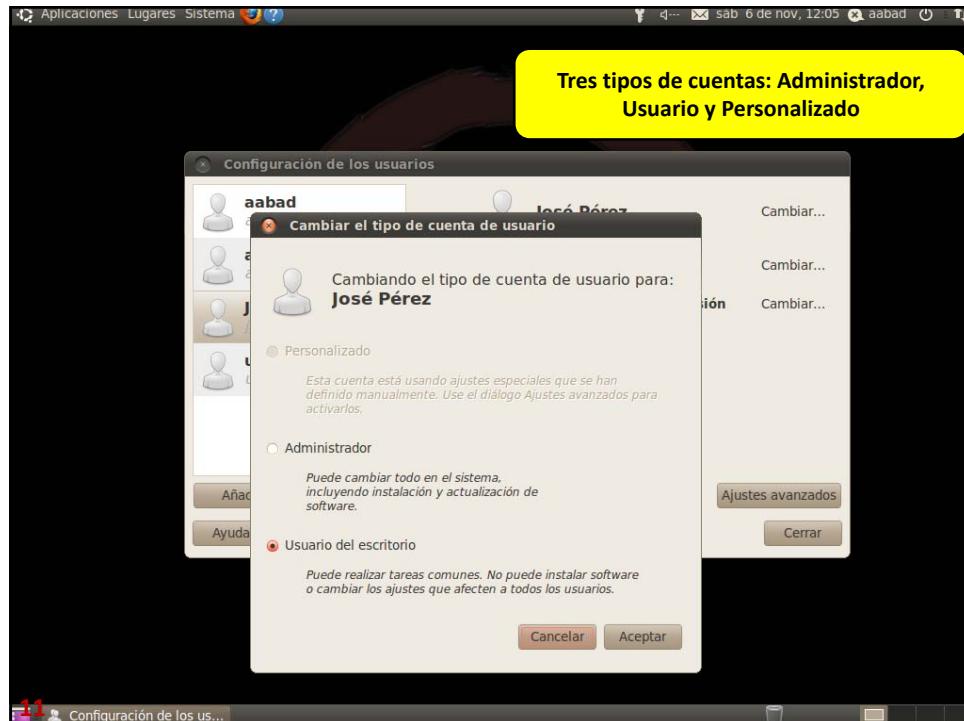

2

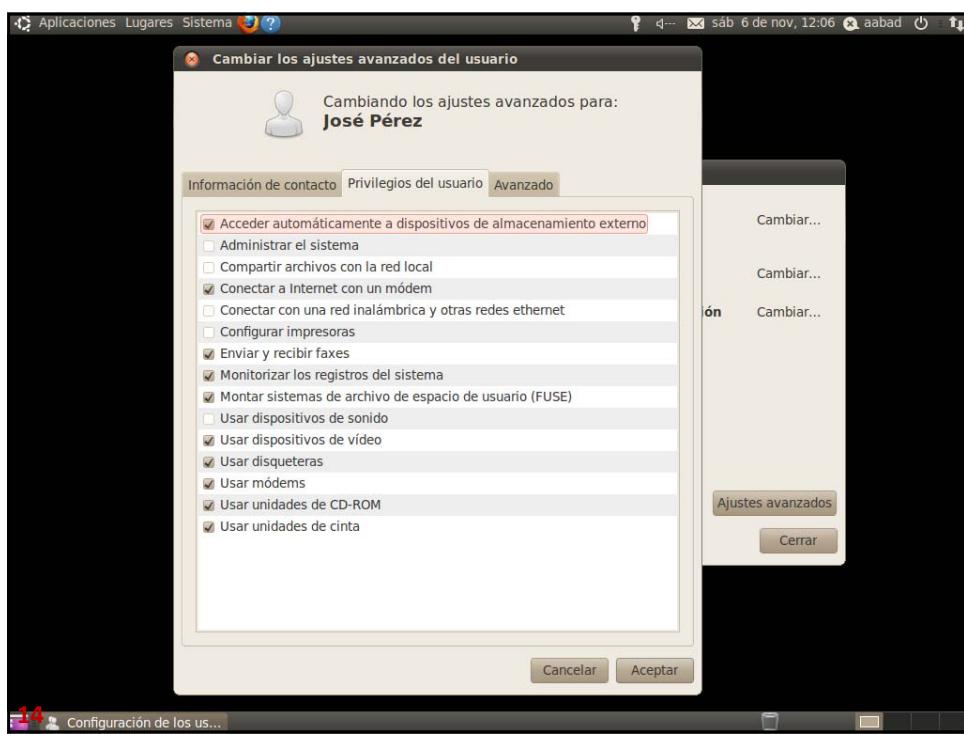

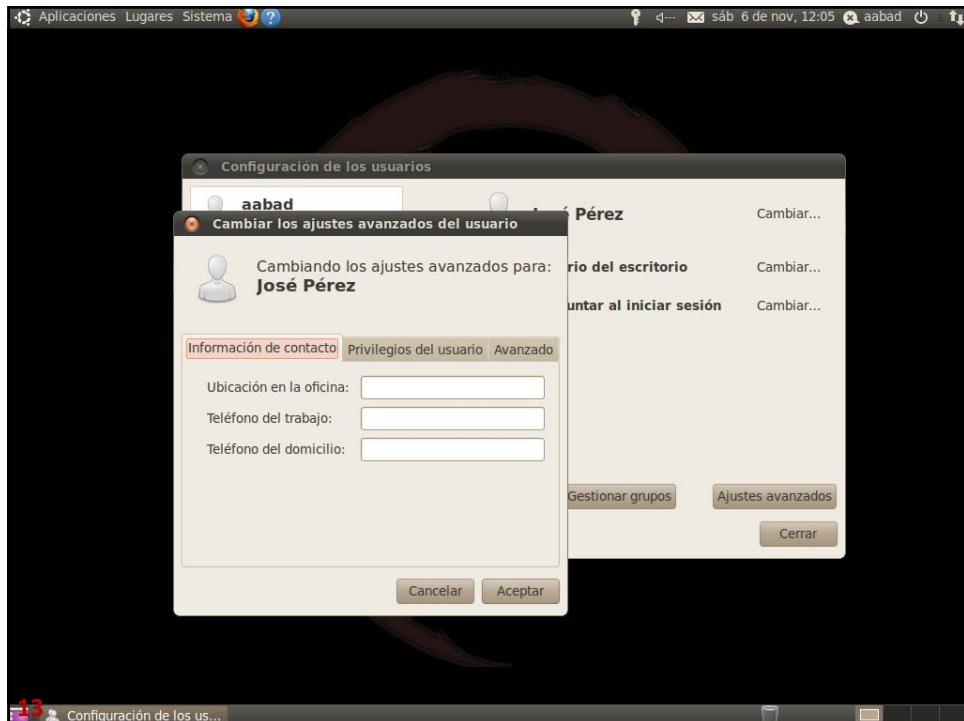

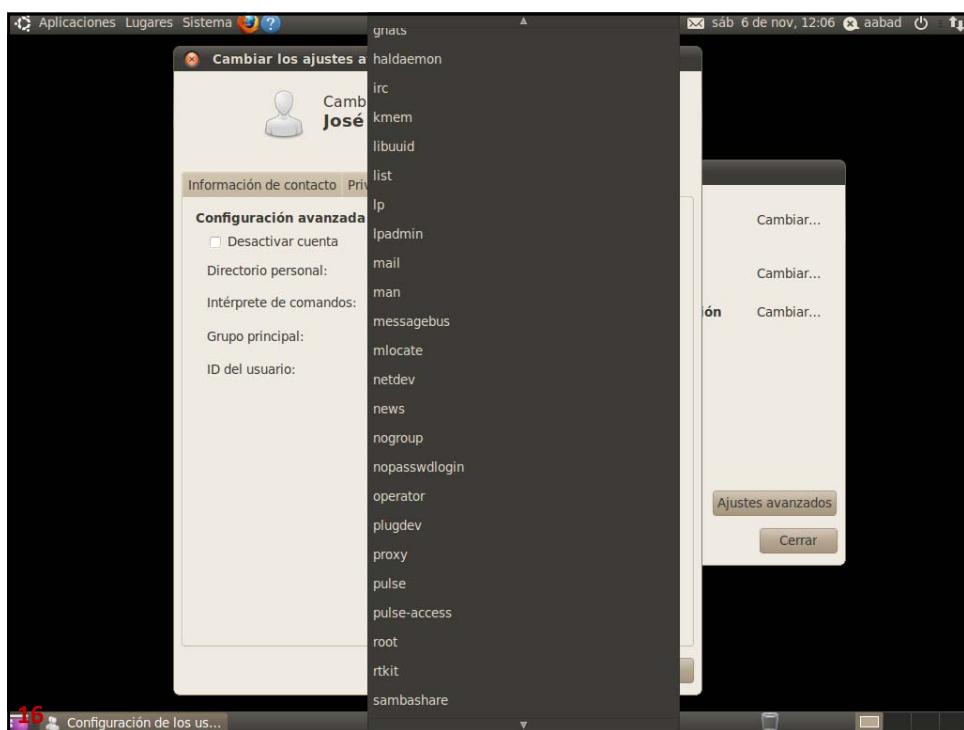

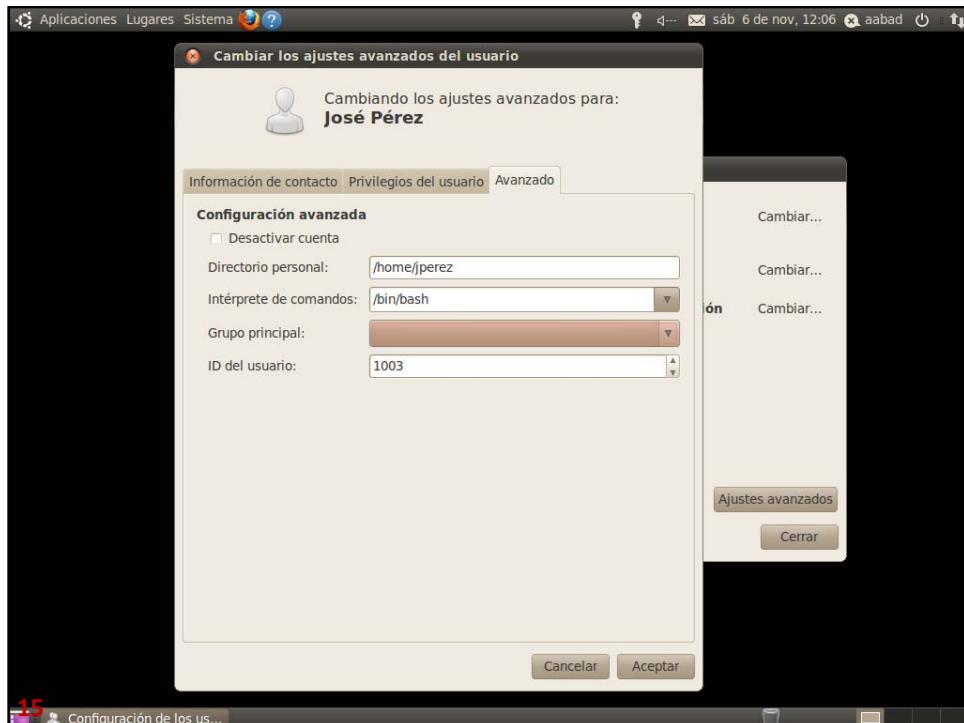

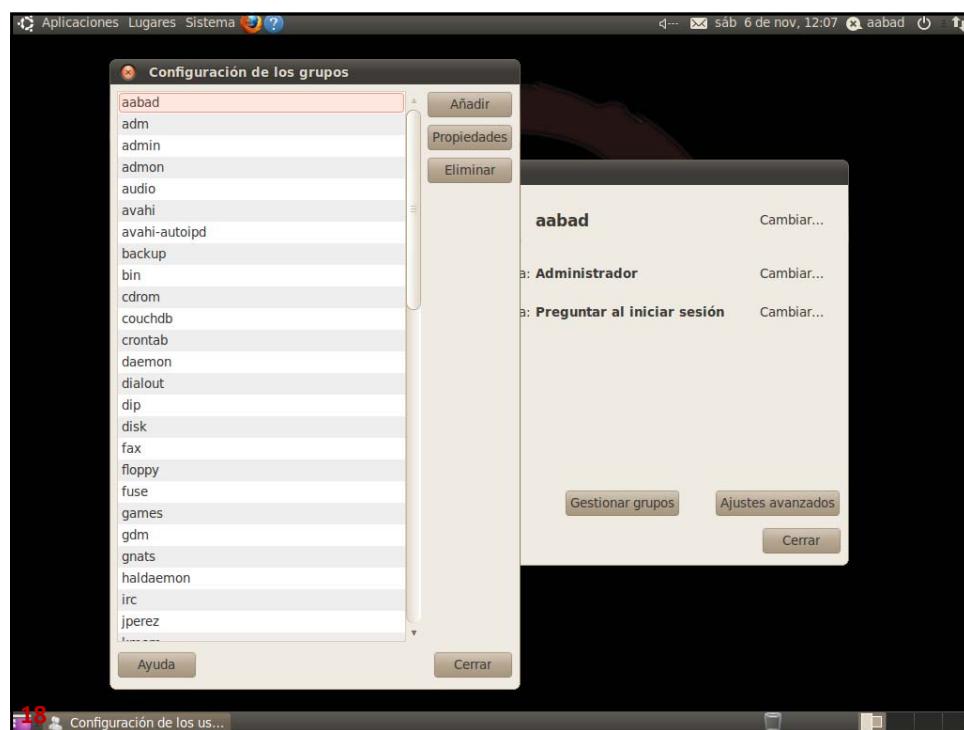

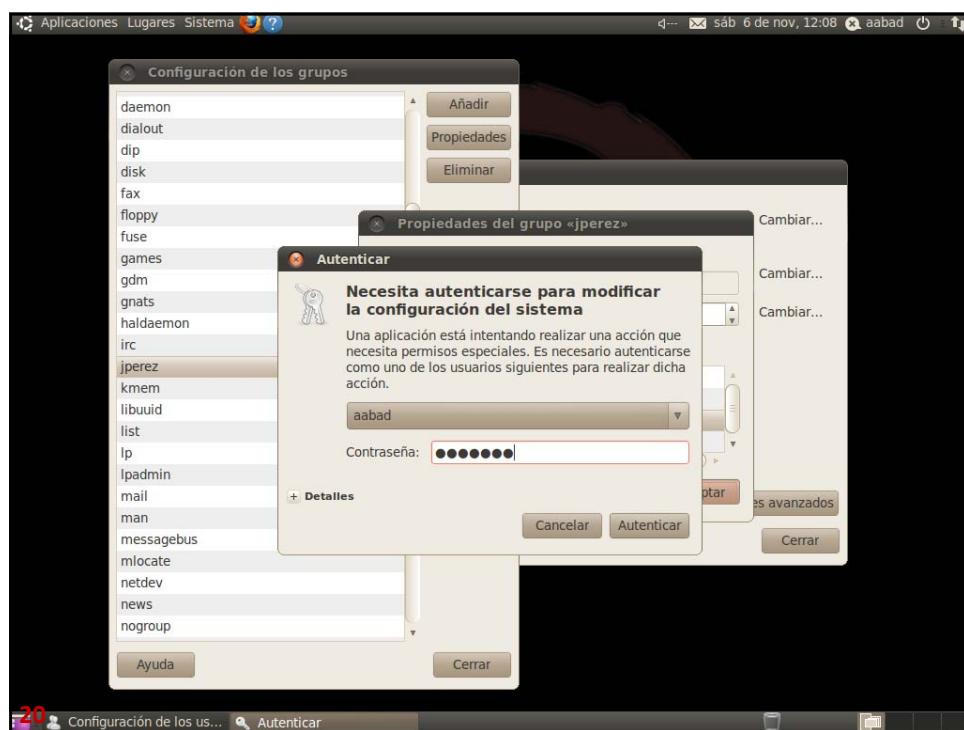

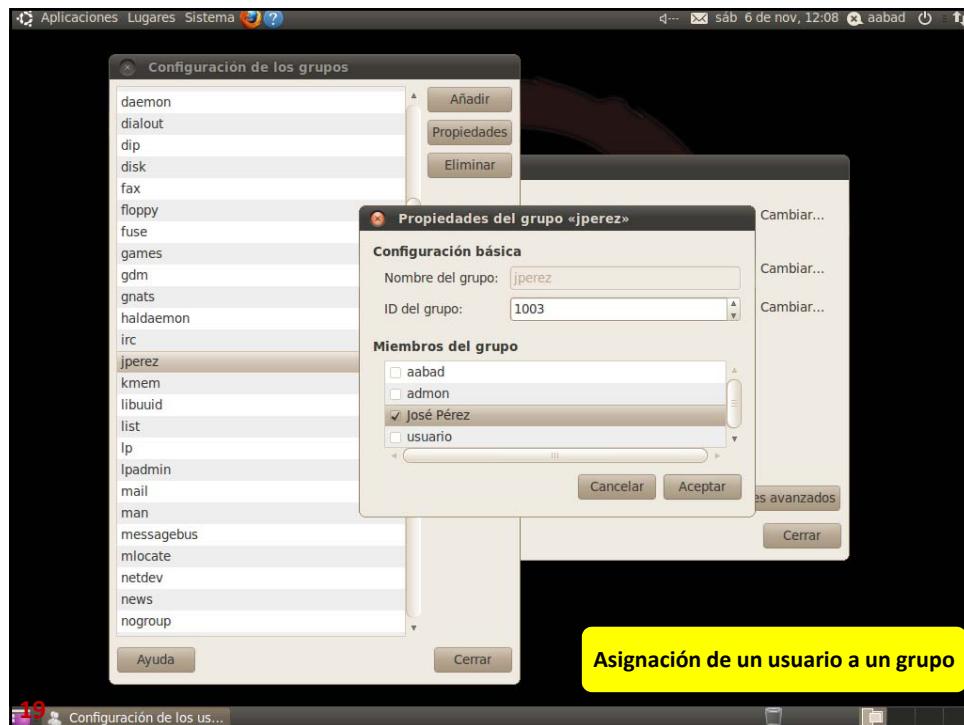

GESTIÓN DE GRUOS

17

Nota: Añadir `sudo apt-get install gnome-system-tools`

GESTIÓN DE GRUPOS EN UBUNTU 12.04 MEDIANTE GUI (CON GNOME)

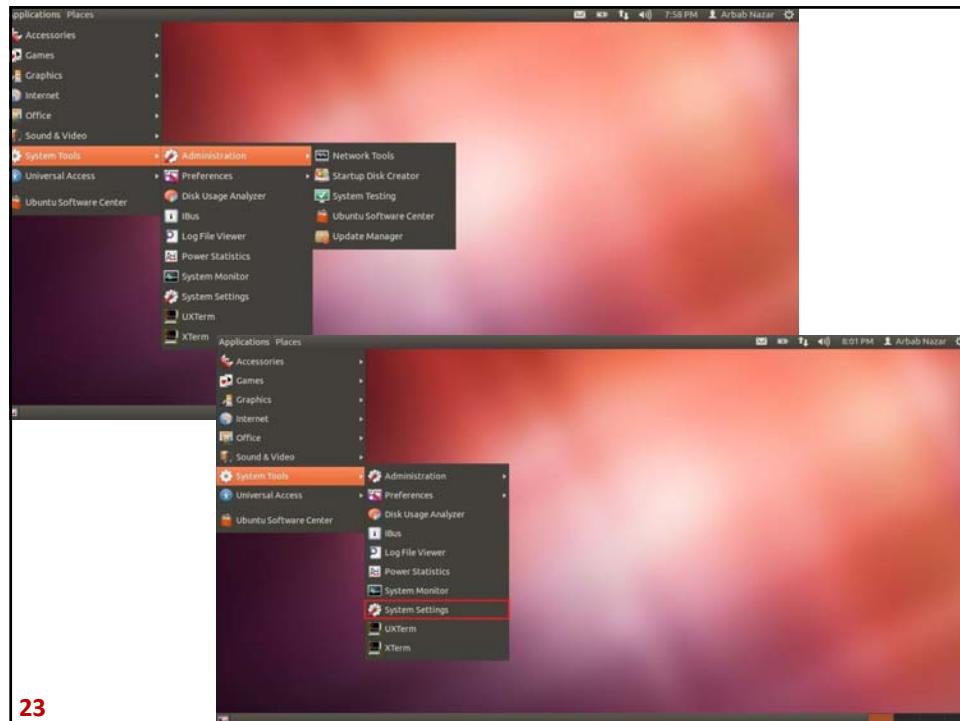

rbgeek.wordpress.com/2012/06/26/graphical-users-groups-management-tool-in-ubuntu-12-04/

21

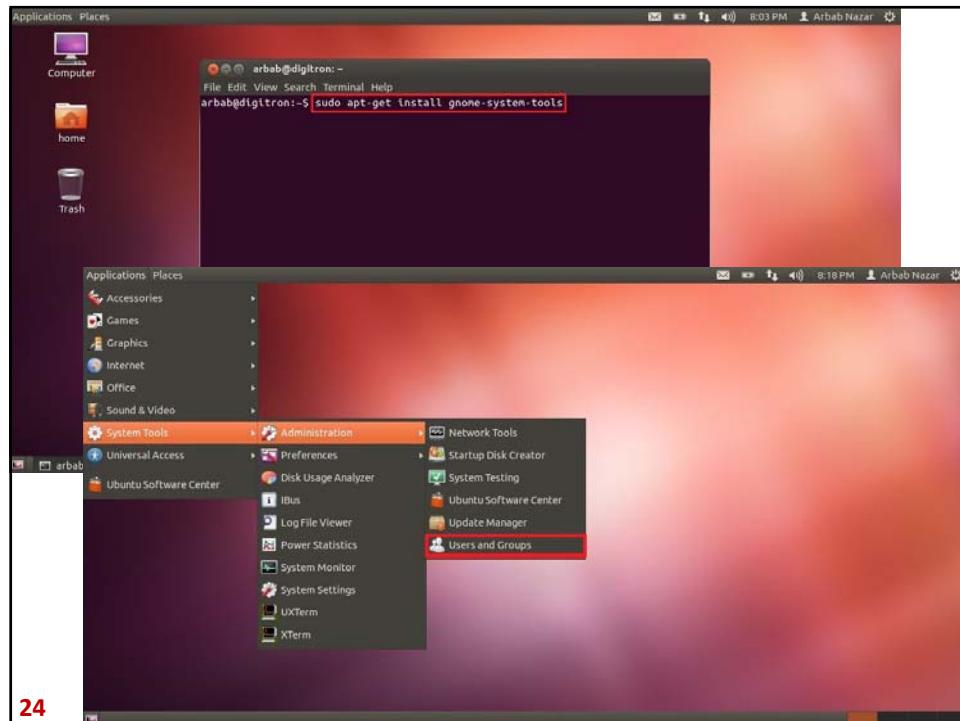

El nuevo entorno gráfico no gestiona grupos de usuarios

- La antigua herramienta “Users and Groups Management” ha sido retirada de Ubuntu 12.04 LTS
- Al panel de usuarios se puede acceder desde “System Tools” -> “System Settings”
 - Pero aquí no aparece la gestión gráfica de grupos
- Hay que instalar, junto con Gnome, gnome-system-tools (ver diapositivas siguientes)
 - `sudo apt-get install gnome-system-tools`
